2001 Crop Default Software Errors

Approved by: Acting Deputy Administrator, Farm Programs

Diane Sharp

1   2001 Crop Default Errors

A
Background

County Software Release No. 451 contained the 2001 Crop Default software. Some errors have been detected when County Offices are creating their crop defaults for the 2001 crop year.

B
Purpose

This notice informs State and County Offices of the errors in the software and the planned corrections for those errors.

C
Description of Errors

The following errors have been detected in the 2001 Crop Default software:

Error Description	Correction
Menu MEALD101 does not display CMD24 for deleting a default. When defaults are rolled from the prior year, the software performs an automatic edit that informs the user of changes that have been made to the current year crop table. CMD24 will allow the user to delete the default if it is no longer needed.	The CMD24 key is working but is not displayed on Menu MEALD101 to indicate that it is a valid option. Use Command 24 when applicable.
Error code 1102 indicating the crop/type is invalid or not active on crop validation file. When the crop validation file was downloaded information such as type, intended use and land use for certain crops was omitted.	The file has been corrected and is ready to be downloaded to the County Office. No action is needed by the County Office.

Disposal Date	Distribution
July 1, 2001	State Offices; State Offices relay to County Offices

1   2001 Crop Default Errors (Continued)

D
County Office
Action

County Offices shall ensure that County Software Release No. 451 is installed by COB February 2, 2001.

Note: If County Software Release No. 451 is **not** installed before download, the County Office will not receive the corrections to the crop table.
